

*Promoting the inclusion of
disadvantaged teenagers through ICT*

NEWSLETTER 2

Dear readers,

We are pleased to share with you the latest developments of the I-TEEN project: Promoting the inclusion of disadvantaged teenagers through ICT, funded by the Erasmus+ programme.

I-TEEN is a strategic partnership project aimed at developing user-friendly educational materials to enhance teachers' pedagogical skills and support secondary school students, particularly those facing physical or psychological disadvantages. At the heart of the project lies the use of information and communication technologies (ICT) to foster the development of key competences necessary for personal fulfillment and active participation in society.

The project aligns with the European Reference Framework of Key Competences (2007), which includes:

- Communication in foreign languages
- Mathematical competence and basic competences in science and technology
- Digital competence
- Learning to learn
- Social and civic competences

- Sense of initiative and entrepreneurship
- Cultural awareness and expression

Project Results

◆ E-learning course for students

An interactive online course aimed at improving students' key competences, with a particular focus on the use of ICT and its application to everyday life contexts.

◆ Toolkit for teachers

A practical and modular tool that offers methodological guidelines, teaching activities, and digital resources easily adaptable to classroom needs.

◆ Role-playing activity 'Adults on Stand-by'

An educational activity based on role-playing scenarios, allowing students to develop decision-making and problem-solving skills in an immersive environment. The game encourages active learning and can be integrated into the curriculum to enhance engagement and transversal competences.

◆ I-TEEN European Web Resource Center

A multilingual, intuitive, and free online platform that hosts all project resources. Available in English, Italian, Spanish, and Slovenian, the platform offers differentiated access for students and teachers, providing all educational materials free of charge.

Conclusion of Training Activities

Training activities for teachers have officially concluded. These were conducted both in-person and online across the partner countries, with strong participation and very positive feedback in terms of effectiveness and applicability of the provided resources.

Final Transnational Meeting in Salerno

The project consortium held its final face-to-face meeting in Salerno, a valuable opportunity to consolidate achieved results and plan the final dissemination actions.

Upcoming Multiplier Events

Project partners are organizing Multiplier Events in their respective countries to share the project results with schools, educational institutions, trainers, and local stakeholders. We warmly invite you to attend these events and explore the developed resources and best practices.

Provide Your Feedback

Those who wish to contribute can fill out a short anonymous questionnaire aimed at collecting specific feedback on the project results, available at the following link:
